

# Pivot Stem Dendrometer DPS40

## Main features:

- Sensing pivot concept
- Calibrated in [mm] of diameter
- Step-less reading
- Easy and fast non-invasive fixing
- Ready for SDI-12 network
- Each sensor individually calibrated

## Specification:

- Working range 5 to 40 mm
- One micrometer resolution
- Accuracy 0.5% full scale
- Tightening strength up to 2 N
- Temperature dependence better than 1  $\mu\text{m}/\text{K}$
