

Introducing the TriCap

A new well plug with 3 options in one for security and sustainability.

Lockable with padlock or self locking bolt.

Vented TriCap with clip for Gas Extraction groundwater loggers

- Have your favourite padlock and keys? Then use the TriCap-S
- Prefer no padlocks? Use the self locking mechanism on the TriCap-S
- Installing water level loggers - use the TriCap-Log which vents to atmosphere and has stainless spring clip for logger attachment
- Want to take gas samples from your gas bores? - Use the TriCap-Gas

Made from Recycled Plastic for sustainability

The FTS TriCap provides:

- **Strong** protection for your monitoring wells
- **Self locking** option with a security bolt, uses a special key tool
- **Flush design** makes it more tamper proof
- **Hanger cable holes** on bottom end of shaft
- Fully **sustainable**, made from recycled plastic waste
- Wide rubber ring provides a **water tight** seal
