

Spectra Hydro Pro Bladder Pump Controller

Introducing

The Spectra Hydro Pro - a professional grade Bladder/Pneumatic Pump controller with built in full duty cycle compressor with a maximum pressure of 150 PSI.

The Hydro Pro is an innovative bladder pump controller and compressor that features a maximum lift of ~300ft with instant pressure.

Meet the Spectra Hydro Pro

The #1 Choice for Ground Water Sampling

Specifications

The Spectra Hydro Pro is equipped with a full duty cycle compressor with 150 PSI maximum pressure capability, an integrated screen with critical visual and immediate flow controls, a flow controller and a liquid gel pressure gauge. The Hydro Pro is fully ventilated with an intake fan and an exhaust, ensuring that all internal components are fully ventilated with airflow. The rugged design of the unit ensures that it is resistant to heat, humidity, rain and field contaminants.

Eliminate the need for external compressors and compressed gas cylinders with the Spectra Hydro and simplify your groundwater sampling processes.

Max Depth

- 300ft/100m at Sea Level

Features

- Digital display featuring pump time and refill time
- Full Duty Cycle internal compressor
- Operate in >100% Saturated Humidity

The Spectra Hydro Pro is the industry leading Bladder Pump controller featuring a professional grade design built to thrive in the roughest conditions.

Sleek Design

Professionally built within a Rugged Pelican Case the Hydro Pro is engineering to withstand all conditions while providing instant pressure build up. Saving you time and stress of operating difficult to use and unreliable instrumentation.

Warranty

Standard Warranty of 1 Year
